

## QUALITY POLICY STATEMENT.

***Adonis Construction are dedicated to the principle of never ending improvements in project design, contract management and client service.***

Our principal aim is to always supply to our clients with design and construction services that conforms exactly to stated or agreed specifications, as well as other statutory and regulatory requirements.

The establishment of a QEMS is therefore the foundation to establish a company culture centred upon continuous quality improvement.

The QEMS is based on the requirements of BS EN ISO 9001:2008 and BS EN ISO 14001:2004. The system has been developed to enable full integration of in-house and client specific requirements.

The aims of the QEMS are to prevent quality defects or potential quality defects at the earliest stage possible. This in turn improves our overall efficiency and assists in the compliance with the annually formulated quality and environmental objectives.

The QEMS will provide the foundations to ensure that all of our services will meet client specification and provide satisfaction with regard to product reliability, quality, delivery and client service.

Top management will formulate quality and environmental objectives annually, during management reviews and will ensure the routine monitoring, measurement and achievement of set objectives.

This policy will be communicated to all staff and any necessary external interested parties i.e. sub-contractors that may be working on our behalf, and will be available to the public via the web site.
